Contrary opinion theory

- Most traders will be wrong at important market turning points
- The largest BULLISH sentiment will occur at or near tops
- The most BEARISH sentiment will occur at or near bottoms
- Is it really that simple?

HOW DO WE USE IT?

- What is contrary opinion and why does it work?
- Maximizing results with market sentiment measures
- How the Daily Sentiment Index (DSI) works

Small trader contrary opinion

- Who is most likely to be wrong at turning points and WHY?
- The BEST source of contrary opinion
- The “reliable anti-authority”
- How does it give professional traders the inside edge?
- I consider small trader sentiment in its various forms to be surrogate inside information since it is neither used, understood or within the reach of most traders – it is *defacto* on the inside
